LETTER OF COMMENDATION TO WORK

on modification of automation system for oil heaters PTB-5-40E
at Booster Pump Station of Zapadno-Synatysskoe oil field
Enisey LLC, Usinsk city
performed by Industrial Automation Systems LLC
(Insist Avtomatika LLC, Omsk city)

In 2007-2009 Insist Avtomatika developed, supplied, and commissioned equipment, trained operating personnel, performed warranty and post-warranty maintenance of APCS of oil heating in two oil heaters PTB-5-40E for BPS of Zapadno-Synatysskoe oil field, Enisey LLC.

The above-mentioned work was performed within the bounds of modification of automation system for direct oil heaters PTB-5-40E with the use of equipment of the off-the-shelf automation system for direct oil heaters ISA-PPN-DSKM developed by Insist Avtomatika.

While performing the work Insist Avtomatika considered operating personnel requirements and peculiarities of the facility.

Application of ISA-PPN-DSKM allowed development of a complex APCS of oil heating with the possibility to remotely control oil heaters, explain reasons of oil heaters shutdown, receive and save data on oil heaters and equipment operation, and operating personnel actions for further analysis.

Use of ISA-PPN-DSKM for modification of automation system for oil heaters PTB-5-40E increased efficiency and safety of oil heaters operation, efficiency of operating personnel actions and enabled integration of APCS of oil heating with APCS of the facility.

Considerable experience in operation of different automation systems allows confirming that nowadays ISA-PPN-DSKM developed by Insist Avtomatika does not have analogues as for functionality, reliability, and quality of equipment.

During warranty and post-warranty maintenance of automation systems for oil heaters Insist Avtomatika specialists quickly reacted to requests of our company demonstrating high engineering level.

Our enterprise is satisfied with the quality of supplied equipment, performed work and level of service provided by Insist Avtomatika and is looking forward for further collaboration.
