LETTER OF COMMENDATION

on work results of Industrial Automation Systems LLC

Beginning from 2000 Industrial Automation Systems LLC has been a subcontractor of Giprotyumenneftegaz LLC on automated process control systems of oil production, treatment and transportation.

Design documentation of the company is characterized by high quality, works are performed according to the schedule, and proposed design solutions have been proved through practice and are used by our specialists as off-the-shelf ones.

Flexible approach of the company to decision-making, quick reaction to change in requirements of customers and our specialists as well as complex character and high quality of delivered services shall be separately marked.

We are satisfied with cooperation with Industrial Automation Systems LLC, quality of developed products and offered services; we are interested in further expansion of cooperation.

Chief Engineer
