Letter of commendation devoted to work done by Insist Avtomatika LLC

Insist Avtomatika LLC during 2011-2012 did the following works on technical re-equipment of telemechanic control system of trunk kerosene pipeline Angarsk – Irkutsk airport:

1. initial investigation
2. system design
3. industrial safety expert review of project documentation
4. equipment supply
5. construction and assembly works
6. commissioning
7. training of operating personnel
8. acceptance tests
9. trial operation of the system
10. commercial operation of the system

Examination of options of technical solutions of telemechanic system done by Insist Avtomatika specialists allowed implementing state-of-the-art engineering solutions for facility automation on budget and was positively assessed by experts.

Note should be taken to high professional level of Insist Avtomatika specialists showed by them at all stages of work starting from inspection of data transfer network and ending with putting it into commercial operation. Qualification of Insist Avtomatika specialists allowed meeting challenges while developing data transfer line and kerosene pipeline industrial communications. Technical solutions on which data transfer network of telemechanic system is built guarantee minimum maintenance costs, high reliability and controllability.

Insist Avtomatika specialists proved their high engineering level. Our company intends to continue cooperation with Insist Avtomatika LLC.

Chief Engineer
