About works carried out by Insist Avtomatika LLC
at RN-Yuganskneftegaz facilities

Dear Vladimir Nikolaevich!

I confirm that during the period from November 2011 to April 2012 Insist Avtomatika LLC carried out trial operations of various types of video cameras at the Priobskoe field, RN-YUNG. Trial operations and comparative analysis of video cameras were conducted during development of low-budget solutions (well pads, pump houses etc.) Operation of video cameras and fixed thermal imager under various weather conditions, in various light conditions was compared. The work is proved with reports and comments.
