

LIMITED LIABILITIES COMPANY
NARYANMARNEFTEGAZ

LETTER OF COMMENDATION TO WORK

At Central Oil Gathering Plant Yuzhno Khylochuyu, Naryanmarneftegaz LLC
performed by Industrial Automation Systems LLC
(Insist Avtomatika, Omsk city)

During 2006-2009 Insist Avtomatika performed work on design, manufacturing, supply, commissioning, and warranty maintenance of APCS of oil heating in two oil heaters PTB-10E at Central Oil Gathering Plant Yuzhno Khylochuyu on the base of a typical automation system for direct oil heaters ISA-PPN-DSKM.

ISA-PPN-DSKM proved to be reliable and easy maintained equipment corresponding to the current safety requirements and enabling diagnostics of product coils state, identification of reasons of process shutdown, and remote control over oil heaters that led to the rise in operating personnel efficiency.

Application of ISA-PPN-DSKM considerably simplifies integration of APCS of oil heating into APCS of facility.

In comparison with existing equipment the automation system ISA-PPN-DSKM for direct oil heating developed by Insist Avtomatika, Omsk city, with the consideration of the requirements of leading in Russian Federation oil heaters developer Saratovsky research and development centre of Neftemash JSC (Syzran city) does not have analogues as for functions and equipment quality.

The flexibility of Insist Avtomatika approach, consideration of requirements of a concrete facility and experience of our specialists along with high technical level of Insist Avtomatika engineering personnel should be mentioned specially.
