LETTER OF COMMENDATION

To results of work of Insist Avtomatika LLC on development and implementation
of automation systems at Omskshina OJSC.

During 2005-2006 under works contract Insist Avtomatika performed work on
development, pre-commissioning, and commissioning of automated control system for
rubber mixing automatic transfer line.

The system is based on Siemens hardware and Siemens AG and WonderWare
software, it includes ingredients dosing and transportation, multiperiod mixing, process
control, control and emergency alarm, rubber mixes recipes control, logging.

All works were performed well and within the time limit. The system is in industrial
operation.

As the result of performed work a decision was taken to collaborate with Insist
Avtomatika in automation of other rubber mixing lines and automation of other
production in the future.

While collaborating Insist Avtomatika specialists showed their competence and a high
level of knowledge, carefulness in development of technical documentation,
interpersonal skills and readiness for business and constructive dialog.

With respect,
Chief Engineer

V. Savenkov
