Letter of commendation

Dear Vladimir Klimentievich!

During 2012 Insist Avtomatika LLC under subcontract with Generation carried out complex of works on the project *Automation system of direct oil heater PTB-5-40E for CPF of the Kazan oil-gas condensate field, Tomskgazprom:*

- manufacturing and supply of automation system of direct oil heaters ISA-PPN-DSKM.421417.204 on Siemens S7-300 series controller (further referred to as the System)
- commissioning of the System
- integration of the System into the existing APCS of CPF of the Kazan oil-gas condensate field.

The applied System has GOST R conformance certificate and permit for use at dangerous production facilities issued by Rostekhnadzor; this System proved to be reliable and easy to operate equipment.

During operation period there were no criticism from operating personnel, no failures of the System. At present there are no analogs of this System as to functionality and quality of equipment.

This project proved high professional level of personnel who besides commissioning performed integration of the System based on software-hardware complex Delta V (Emerson) to the existing APCS of the Kazan oil-gas condensate field. Personnel of Insist Avtomatika LLC additionally developed humane-machine interface and provided output of oil heater PTB-5-40E parameters to the existing operator station.

Note should be taken to intention of Insist Avtomatika LLC to maximally fulfill requirements of our specialists and high quality of services.

Yours respectfully,
Head of Automation, Metrology and Communication Service
